Individual Progress Report:

Week 1

Weeks goal- Start learning any language out of Python/Java/PHP.
Deliverable- I should atleast be able to write a good code in any of them.

#1. I learnt about what all stuffs I need to learn in order to succeed in life.
#2. I started learning python (I started a course in python from Edx).
#3. By the end of the week, I was able to write codes in pyhton which I was afraid to even attempt before.

Accomplishments- Started with python and devoted quite a time onto it.
Next Week goal- To come up with innovative ideas.

Week 2

Previous Week's goal- To learn any 1 new language.
Present Week goal- To get some innovative idea for Passion project/Team project. To learn more of python.

#1. I, along with my other team members was able to get some innovative ideas for the projects.
#2. I continued working with python and didn't quit it in midway like before.
#3. I looked at other languages as well like HTML, CSS.

Accomlishments- Thinking of some innovativ ideas, continued learning of language, revising HTML, CSS.
Next week goal- Finalise on the projects, technologies and timeline.

Week 3

Previous Week's goal- To think of innovative project.
Present Week goal- Freeze upon the projects and the technologies.

#1. Had a great discussion with sir and got to know about what are the possible fields to exploit.
#2. Had to look out for best combination for the languages to use for the projects.
#3. Learnt to think in innovative manner.
#4. Learnt about what are the trending languages used for developing softwares.
#5. Wrote the group proposal along with my other team members.
#6. Learnt to estimate the timeline to deliver a software after a hefty discussion with my friends.
#7. Python :P

Accomplishments- Started thinking in an innovative manner.
Next week goal- Start implementation.
